

THE STUDCO UPDATE

NEWS & UPDATES FROM STUDCO BUILDING SYSTEMS

SUMMER/FALL '12

Save Time With RAPIDTRACK™

The new RapidTrack™ from Studco Building Systems is the superior solution for vertical deflection in steel stud framing systems.

RapidTrack™ is a 2" high deflection track with vertical slots spaced at 1" increments that is designed to save you time, reduce the number of components used and improve the performance of external steel stud walls. The wall studs are screw fixed to the RapidTrack™ through the slots provided which allows for vertical live load movement in the primary structure of up to 1 3/16" without transferring axial loads to the wall studs. ■

With RapidTrack™, the wall studs can be screwed to the top track without compromising the deflection capabilities of the wall system.

RapidTrack™ is designed to reduce construction time and improve wall performance

Rapid Finishing With EZYreveal

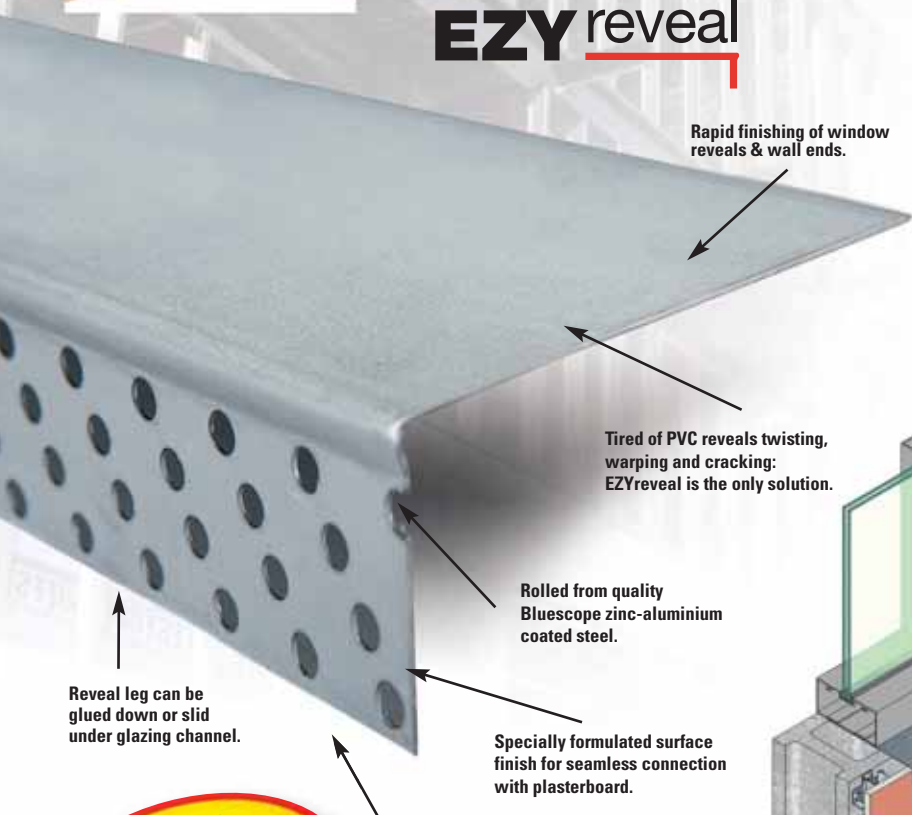

Use with StudcoPFT19A PVC trim to create custom size reveals

EZYreveal

Studco welcomes four new sizes to the EZYreveal family: RA60, RA75, RA80 and RA110.

Now in stock and ready for immediate despatch, these new sizes compliment the nine standard sizes of EZYreveal already produced by Studco. EZYreveal continues to be the market leader in window finishing sections, demanded by more and more developers, builders and drywall installers because of the clean lines, subtle tones and premium strength only offered by genuine EZYreveal. ■

Rapid finishing of window reveals & wall ends.

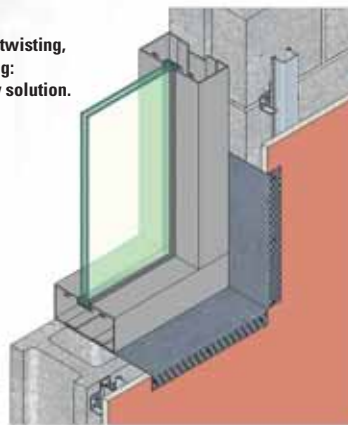

Tired of PVC reveals twisting, warping and cracking: EZYreveal is the only solution.

Rolled from quality Bluescope zinc-aluminium coated steel.

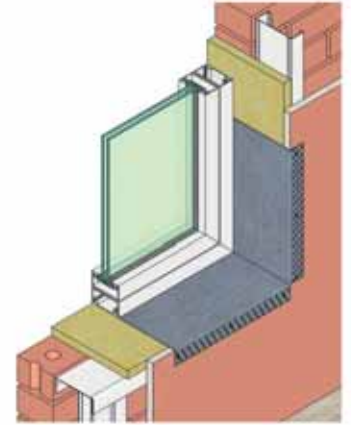

Specially formulated surface finish for seamless connection with plasterboard.

Reveal leg can be glued down or slid under glazing channel.

Use normal acrylic undercoat paint with EZYreveal – no additional preparation needed.

EZYreveal is ideally suited to commercial window & shopfront applications

For domestic windows, slide the EZYreveal behind the window for a seamless finish

Now Available in Custom Lengths
